

Text Message Archiving

Just like you already archive your email messages, it's time to start archiving your text messages. Mobile archiving is already required by industry privacy and security standards. Considering that more work-related activities are done on personal mobile devices, it is essential to monitor, archive, and retrieve those messages with containing work-related content.

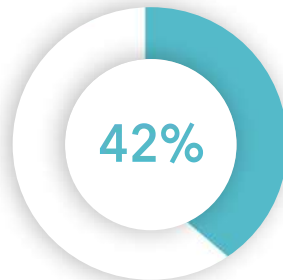

The use of the mobile device in the workplace has dramatically changed the way we work.

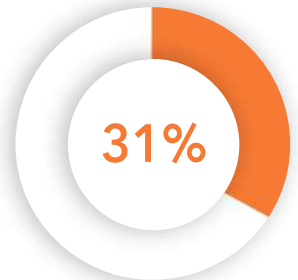

of an information worker's time is spent on a mobile device

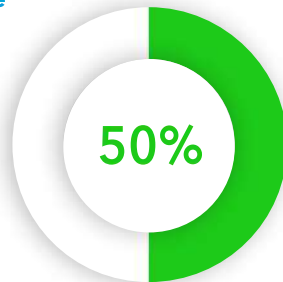

of employees use mobile for work while on personal time

of work-related content is accessed via mobile devices

of content is created on mobile device

Only 50% of work generated on mobile is ever archived

Archiving messages is an essential business practice, and often required by regulations that govern your business.

With all of the business messages and electronic files that are sent via text message or chat app, it is critical to protect and archive business mobile communications.
