

TeleMessage text archiving for Verizon

Direct SMS and MMS text capture for Verizon mobile phones

Archive text messages with leading enterprise archiving vendors

Archive employee text messages in the Cloud or On-Prem

**Be Compliant With:
Public Record and Sunshine Laws,
FOIA, SEC, FINRA...**

- Capture and retain corporate-owned phone communication
- Store with a variety of cloud or on-prem archiving vendors
- Run search and eDiscovery based on sender/receiver:
number, text, date range, message type, attachment or employee email
- Download mobile archiving reports
- Combine Verizon with text archiving from other carriers and channels

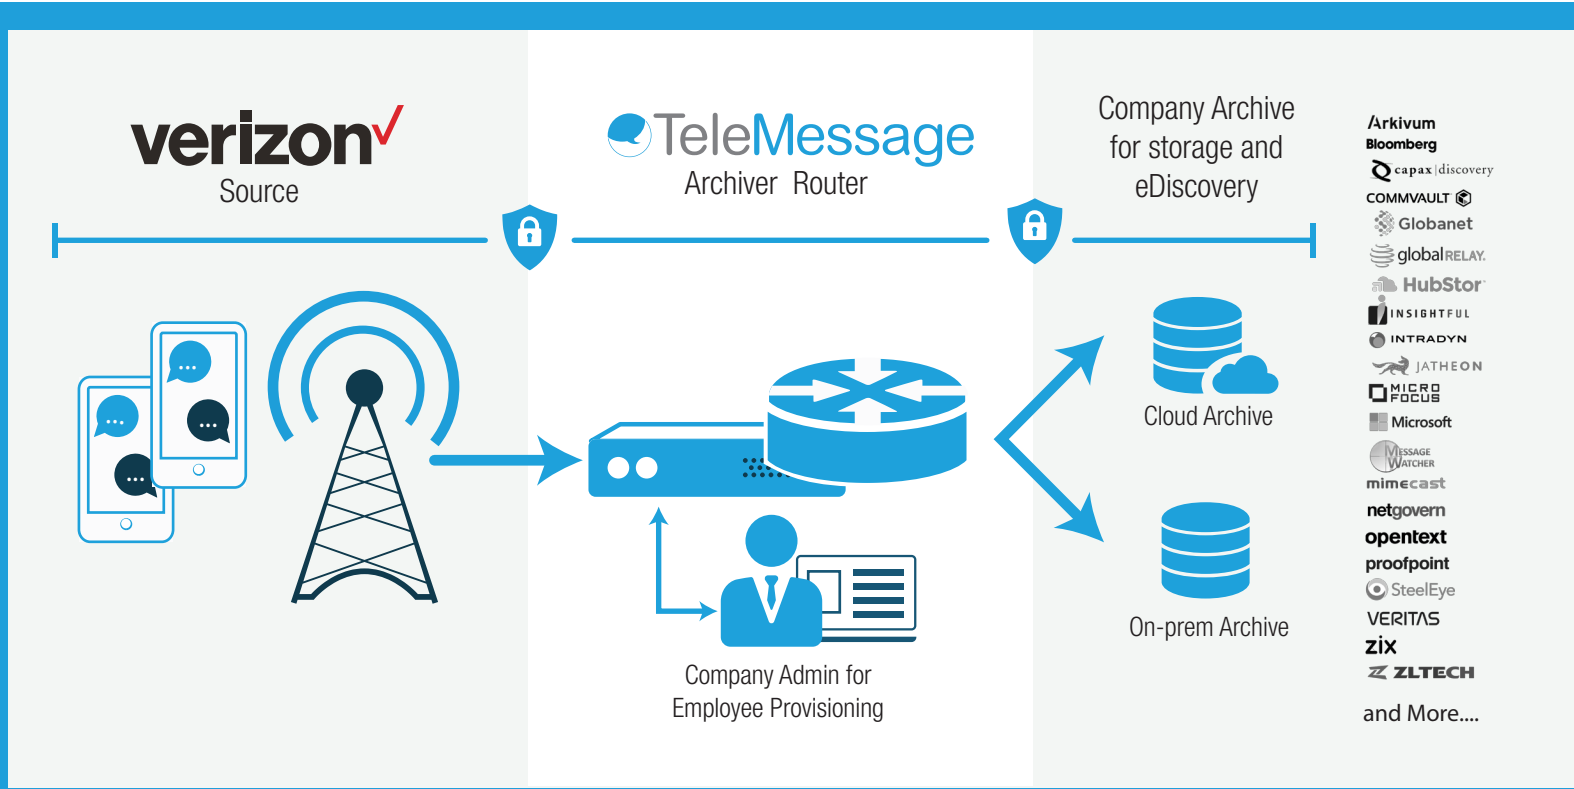

TeleMessage text archiving for Verizon

How it Works

- Text messages are captured on the Verizon Network
- A copy of the message is forwarded to TeleMessage
- TeleMessage archive router forwards the message to the company archive
- Messages are deleted from the TeleMessage archive router once archived

Benefits

- Works for corporate-owned smartphones and legacy phones
- Deposit messages and integrate with any email archive
- Search employees' mobile communication in any on-prem or cloud storage
- End-to-end encryption from Verizon network to enterprise archive
