

TeleMessage text archiving for AT&T

Direct SMS and MMS text capture for AT&T mobile phones. Archive text messages with leading enterprise archiving vendors

Archive employee text messages in the Cloud or On-Prem

Be Compliant With:

Public Record and Sunshine Laws, FOIA,
SEC, FINRA and other Recordkeeping & Archiving Regulations

- Capture and retain corporate-owned phone communication
- Store with a variety of cloud or on-prem archiving vendors
- Run search and eDiscovery based on sender/receiver: number, text, date range, message type, attachment or employee email
- Download mobile archiving reports
- Combine AT&T with text archiving from other carriers and channels

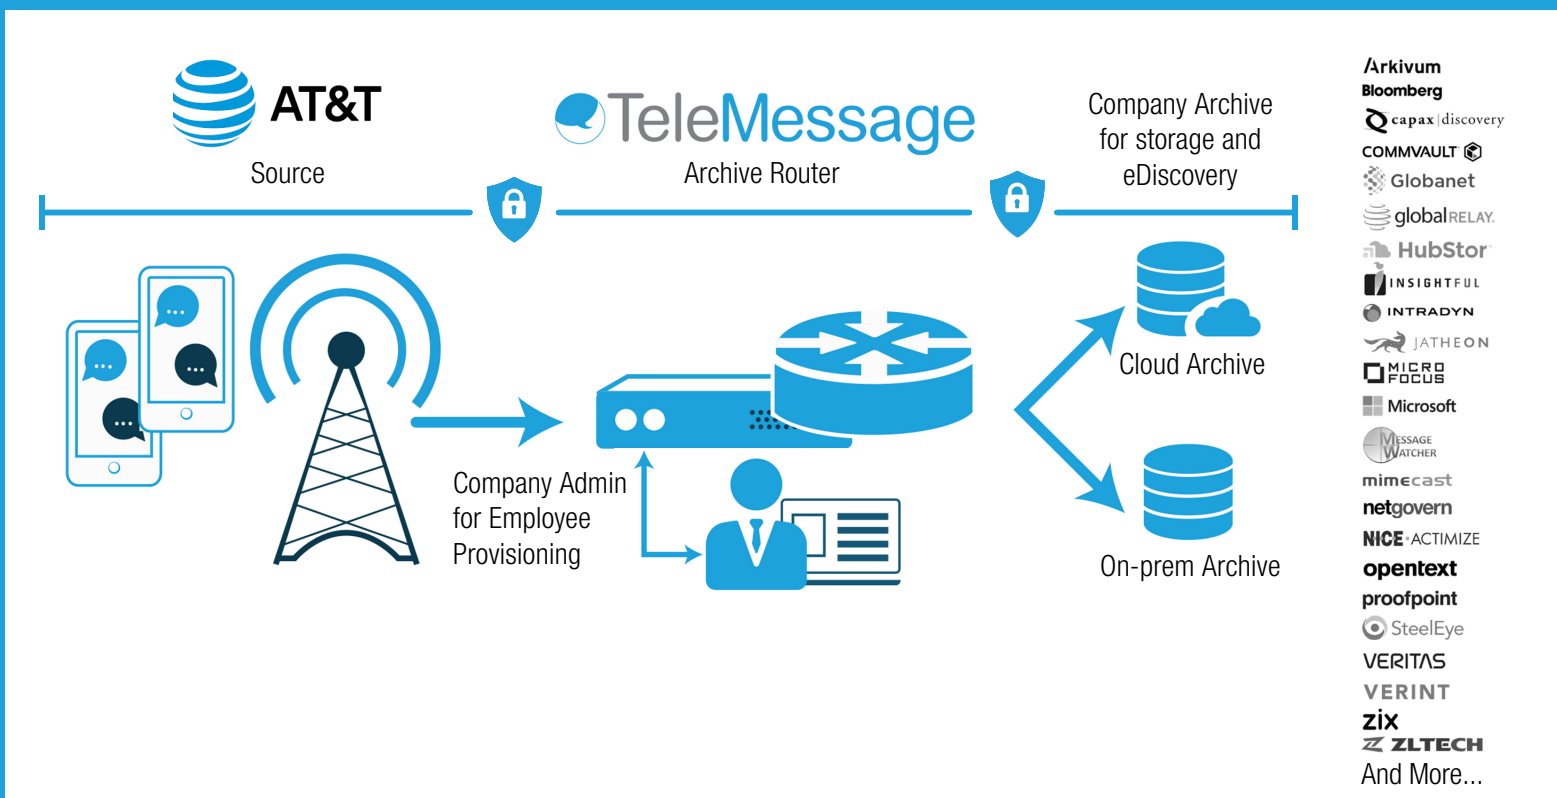

TeleMessage text archiving for AT&T

How it Works

- Text messages are captured on the AT&T Network
- A copy of the message is forwarded to TeleMessage
- TeleMessage archive router forwards the message to the company archive
- Messages are deleted from the TeleMessage archive router once archived

Benefits

- Works for corporate-owned smartphones and legacy phones
- Deposit messages and integrate with any email archive
- Search employees' mobile communication in any on-prem or cloud storage
- End-to-end encryption from AT&T network to an enterprise archive
