

TeleMessage Text Archiving for TELUS

Direct SMS text capture for TELUS mobile phones.
Archive text messages with leading enterprise
archiving vendors

Archive employee text messages in the Cloud or On-Prem

Be Compliant With:

IIROC, SEC, FINRA, Access to Information Act, Public Records
& other Canadian Recordkeeping & Archiving Regulations

- Capture and retain corporate-owned phone communication
- Store with a variety of cloud or on-prem archiving vendors
- Run search and eDiscovery based on sender/receiver: number, text, date range, or message type.
- Download mobile archiving reports
- Combine TELUS with text archiving from other carriers and channels

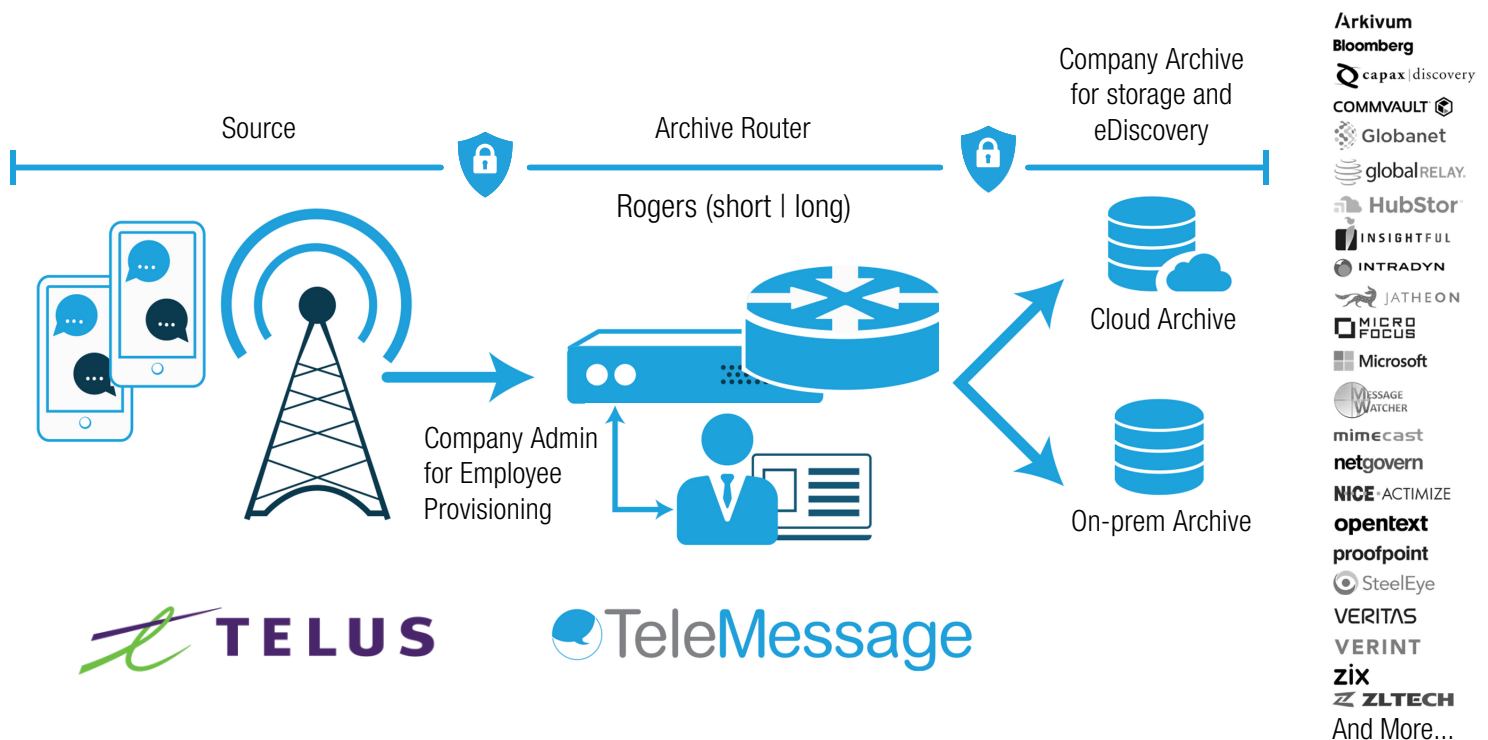

TeleMessage Text Archiving for TELUS

How it Works

- Text messages are captured on the TELUS Network
- A copy of the message is forwarded to TeleMessage
- TeleMessage archive router forwards the message to the company archive
- Message is deleted from the TeleMessage archive router once archived

Benefits

- Deposit messages and integrate with any email archive
- Search employees' mobile communication in any on-prem or cloud storage
- End-to-end encryption from TELUS network to an enterprise archive
- Works for corporate-owned smartphones and legacy phones
